

## Vesys Design

Education Duration :2 Days

Education Language : Turkish

Tranier : Gürkan Göğüş

Prerequisite : Basic knowledge of CAD tools

Target Audionce : -

Content :

This course is designed to equip you with the methods and skills used to create and maintain wire harness drawings and the associated component database.

### You Will Learn How To

- Create and maintain a component database
- Create connector/component symbols
- Create a schematic drawing within a designated project area
- Understand and correct design errors
- Produce schematic reports
- Import and export data

### Hands-on Labs

- Creation of components
- Creation of symbols
- Creation of schematic drawings
- Generation of design reports

### Key Topics

- Component data input and maintenance
- Creation and maintenance of a schematic diagram
- Component sharing
- Simulation of schematics

## **Vesys Harness**

Education Duration : 2 Days

Education Language : Turkish

Tranier : Gürkan Göğüş

Prerequisite : Basic knowledge of CAD tools

Target Audionce :

Content :

This course is designed to equip you with the methods and skills used to create and maintain harness drawings and the associated component database.

### You Will Learn How To

- Create and maintain a component database
- Create component symbols
- Create 2D harness drawings
- Understand and correct design errors
- Produce manufacturing reports
- Import and export data including importing VeSys 2.0 design data
- Create scaled drawings of harnesses

### Hands-on Labs

- Creation of components
- Creation of harness drawings
- Creation of symbols
- Importing of data
- Correction of design errors

### Key topics

- Component data input and maintenance
- Harness creation
- Harness processing/checking
- Harness Reports

- Synchronizing data
- Design change management
